

2 Drum Steel Stacker Spill Pallet SKU# 9012-BU

Most spills occur when dispensing or transporting chemicals. The steel stacker transport pallet allows you to move drums safely and securely around your facility by forklift. These containment units even stack on top of each other for a convenient, portable racking system.

- Compliant containment for two 55-gallon drums
- Certified leak-free with 100% inspected welds
- Steel sidewall for security during transportation
- Forklift friendly
- Galvanized grating
- Chemical resistant finish
